

FISH THE DAYS AWAY IN THE SAVAGE 455 PIRANHA

Have some fun fishing this weekend in the new 455 Piranha from the oldest aluminium brand in the business, Savage.

Since 1898 Savage has been designing and building some of the toughest models on the water and the new 455 Piranha is no exception, built to last for generations of boating enjoyment.

The 455 Piranha features the new Ultra Lift Hull, which has a reverse chine improving the hulls efficiency by giving the boat lift and stability through the water.

With the introduction of modern, sleek and tough plate 3mm bottom sides and 2.50mm topsides, this is one model with the potential to become a serious fishing favourite.

National Account Manager Cameron Wood comments; “like the 435, the new 455 Piranha has the option of being a tiller steer, side or centre console making it extremely versatile to suit individual needs”.

“Being solidly built and durable, this model is an economical and no-fuss way to get into the boating and fishing lifestyle,” Cameron said.

“Featuring a maximum 60HP rating and a 70 litre fuel tank, the 455 Piranha can whisk you and your three mates away for a day of adventure on the water in comfort.”

The new 455 Piranha also features a front casting platform, 33 litre live bait tank, 2 rod holders and side pockets as standard all backed by Savage’s three year warranty.

Optional extras available include transom step and rail, Bimini and envelope, fold down drink holders, Mark-5X fishfinder and bow mount thruster plate.

The Savage 455 Piranha is the perfect mid-sized fishing boat and will ensure a great day out on the water no matter the size of the catch.

SAVAGE

Pretty Tough
